## **DETAILED ACTION**

Page 2

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-8, drawn to a method for computing optical performance monitoring information, classified in class 398, subclass 26.
  - Claims 9-14, drawn to an optical add/drop multiplexer, classified in class 398, subclass 83.
- 2. Inventions I and II are directed to related optical performance monitoring. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, invention I addresses a method for performance monitoring in a network, specifically computing an OSNR value, but does not mention or require an add/drop multiplexer. Invention II addresses an add/drop multiplexer that has performance monitor cells, but does not mention or require any specific type of performance monitoring or method of computing performance monitoring information.
- 3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/642,479

Art Unit: 2613

Because these inventions are independent or distinct for the reasons given above and

Page 3

the inventions require a different field of search (see MPEP § 808.02), restriction for

examination purposes as indicated is proper.

Conclusion

5. Any inquiry concerning this communication from the examiner should be directed to N.

Curs whose telephone number is (571) 272-3028. The examiner can normally be reached on

M-F (from 9 AM to 5 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jason Chan, can be reached at (571) 272-3022. The fax phone number for the

organization where this application or proceeding is assigned is (571) 273-8300. Any inquiry of

a general nature or relating to the status of this application or proceeding should be directed to

the receptionist whose telephone number is (800) 786-9199.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pairdirect.uspto.gov. Should you have questions on access to the Private

PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
